KIDS AT WORK®

The computer construction program that lets you build your own neighborhood

Here's your chance to create the neighborhood you've always wanted to live in. It's easy and fun.

First you decide if you prefer the busy city or the quiet country. Then you set your construction crew to work. Everything you need to create a country or city neighborhood is right there—from houses and barns to fountains and clouds to gorillas and cows. All you have to do is put them together.

You can also draw your own buildings, scenery, and even animals. And use them to build neighborhoods like nobody has ever seen.

Once you've finished with the construction work, you can print pictures of your amazing creation and show your parents and friends exactly where you want to live.

Learning Opportunities

KIDS AT WORK sharpens spatial awareness and encourages creative thinking. It also introduces your child to computer graphics.

Contents: 1 disk, 1 handbook, 1 reference card
